

# 700 SERIES

## VINYL WINDOW

The 700 Series vinyl window has been engineered to be a leader among comparable products. The 3/4" I.G., integral J-channel and fusion welded frame are all design characteristics that enhance the performance of the window. Argon and Low-E options are available.

Additionally, the entire frame utilizes a multi-hollow frame design, an aluminum reinforcement and extended nail fin to enhance the overall durability of the unit.

Performance is a critical element of any window design. However, so are the aesthetic elements. The 700 Series vinyl window incorporates a beautiful profiled exterior to enhance the curb appeal and to add value. 700 Series are available in white and sandstone.
