

No. 180 Trimmable Butyl

IDEAL FOR RUBBER ROOFS

No. 180 Trimmable Butyl is an off-white, non-hardening elastic butyl based material. It provides excellent sealing adhesion to any type of metal, wood, concrete, glass, plastics, and porous surfaces. Can be used under moldings; around windows, doors and vents, it can be trimmed easily with any stiff, pointed non-scratching object. 180 increases in adhesion with age, after it is applied. It can be pressed and formed to obtain a water and air tight seal. The recommended temperatures it can be applied at are between -30F and 200F; best results if applied at room temperature on dry materials.
